HEALTHY VOLUNTEERS NEEDED FOR RESEARCH IMAGING STUDY (MRI) AT MGH/YAWKEY

The Massachusetts General Hospital (MGH) Martinos Center for Biomedical Imaging is seeking healthy adult subjects aged 18-64 to participate in a magnetic resonance imaging (MRI) research study. The purpose of this research study is to further develop novel MRI techniques. MRI is a safe, non-invasive imaging modality.

Subjects will come to the MGH or Yawkey imaging facility and be placed in an MRI scanner for a session lasting about one hour. There will be a \$50 compensation provided to the subject for participating in the study.

For additional information about enrolling in this study, please contact:

mri-study@nmr.mgh.harvard.edu

<p>Partners Human Research Committee APPROVAL Effective Date March 09, 2010</p>
