

## *Brain Imaging Research Study of Parkinson's Disease*

- The Cognitive Neuroimaging Group at Boston University is looking for people with Parkinson's Disease for anatomical MRI scanning.
- The purpose of this research is to understand how Parkinson's Disease may affect the cortical thickness and the integrity of white matter tracts of the brain.
- Participants will receive financial compensation for joining the project (**\$50**) and will be given a MRI picture of his/her brain.
- There are no known risks for the MRI procedure.
- The MRI scanning will take place at the MGH-NMR Center in Charlestown where some additional behavioral testing may also take place (Compensation is **\$25**). Weekday and weekend morning and afternoon times are available.
- If you have any questions regarding the research or would like to participate, please contact the study coordinator **Sule Tinaz** at (617) 353-1433 or at [atinaz@bu.edu](mailto:atinaz@bu.edu). We will set up an initial screening, which involves answering questions about your health history. If you qualify, we will arrange a convenient testing time.
