

## Recruitment Posting

### Healthy Men and Women Wanted for Research Study

We are looking for healthy men and women (aged: 18-70 years) for a research study involving Magnetic Resonance Imaging, conducted by the Massachusetts General Hospital at the Athinoula Martinos Center for Biomedical Imaging, Charlestown, MA.

Participants **must not** have:

- electrical implants such as cardiac pacemakers or perfusion pumps
- ferromagnetic implants such as aneurysm clips, surgical clips, prostheses, artificial hearts, valves with steel parts, metal fragments, shrapnel, tattoos near the eye, or steel implants
- ferromagnetic objects such as jewelry or metal clips in clothing
- volunteers must not be pregnant
- pre-existing medical conditions including a likelihood of developing seizures or claustrophobic reactions, and any greater than normal potential for cardiac arrests.

Call Dr. A. Aria Tzika at (617) 371-4871 or by email at [atzika@partners.org](mailto:atzika@partners.org) ; or Dr. Dionyssios Mintzopoulos at (617) 722-3000 ext 4452 or by email at [dionyssi@nmr.mgh.harvard.edu](mailto:dionyssi@nmr.mgh.harvard.edu).

Participants will be paid \$25 to compensate them for their time.
